Outline of Topics Covered:

1. Students will learn about the different roles associated with video production.
2. Students will learn how location plays a pivotal role in video production.
3. Students will learn why setup is an important aspect of video production.
4. Students will learn about audio equipment and best practices for audio gathering.
5. Students will be taught lighting basics.
6. Students will learn about the importance of white-balancing.
7. Students will learn about the interview process.
8. Students will learn about the importance of B-roll.

Optional Student Based Project
After students have completed the video tutorials and worksheets, ask them to use what they have learned (and they can use their worksheets to help them remember) to create a crash course booklet in production. Each topic should get one page, plus there should be a cover-page, introduction page, one page that lists the top 5 “Do’s” and “Don’ts” and a back cover for a total of 12 pages.
